Kings county guide to urban moonshining pdf

I bought this one on a whim. My wife won a ticket to see Collective Soul unplugged at a small place recently while waiting. I saw this book shown in the souvenir shop and decided to give it a go. I was the first to say that if you like the taste of something, I consider myself drinking whiskey - and by no means a connoisseur. I do admit that I have been interested in the distillation process, but not curious enough to actually do any research, but like many books in my library that once expanded, I bought this on a whim. My wife won a ticket to see Collective Soul unplugged at a small place recently while waiting. I saw this book shown in the souvenir shop and decided to give it a go. I'm the first to say that if you like the taste of something, that's all that really matters, there are those who are pretentious who think that if you don't drink Johnny Walker Blue, then you have to drink tap water - and those people I say get a life. The book - written by two distillers - begins with a history of whisky (or whiskey, Bourbon, Tennessee Sour Mash, or any other name you might know by). They get in bootlegging, different kinds, reasons for many names and what happens during Prohibition. They then move on to very detailed instructions to create and distill your own set of moonshine, pay attention to the law in your state - just own still mine (VA) is a punitive offense, even if it's just water still. After that, they move on to the trick to turn the distillery right. If you want to know how the nectar of the gods, amber is created with many different styles created from this book for you. Bravo!... Add, fill, add, fill.
